

## DOMAIN MANAGEMENT

Managing domain names for your online business can be difficult to say the least. Domain Registrations, Transfers and Invoices from multiple vendors is enough of a hassle, not to mention the horrible interfaces not designed for managing multiple domains and DNS. Managing multiple TLD's with different pricing and rules can also add extra work that can take many hours of management time per year if you a few hundreds of domains.

CloudfloorDNS is different. We've taken the pain out of Domain and DNS management! With CloudfloorDNS you get a one-stop-shop for DNS/Domain Management. Bulk update options allow you to click and set over some or all of your domains. Update WHOIS registration data quickly and easily, or instantly change Name Server records and even push out multiple bulk DNS updates.

## Manage your Domain Name Portfolios & DNS with ease!

Registrations are a breeze with pre-defined groups and name server settings. Enter your registration details once, search and buy a domain name in seconds with your prefunded account. Add DNS with another click, or set your DNS information in a template for future use on other domains.

With our domain registration services you have access to more than any other managed DNS provider on the planet. Choose from over 170 TLD's from all the popular TLD's (.com, .net, .org, .info, .biz) to the most popular international domains (.it, .fr, .de, .es, .uk, .eu)

### How our Domain & DNS Management is Different:

- Credit system allows you to pre-fund your account and get lower domain costs the more you add to your account

- Templates for Registrations, DNS Settings and DNS Zones for quick and efficient setup and management
- Bulk domain and DNS edits make large domain portfolio's a breeze to manage.
- Over 170 TLD's to choose from when registering domain names – more than any other Managed DNS provider
- Free WHOIS Privacy, Domain Locking, Automatic renewal options for all domains
- Secure Web and Domain Management panel makes DNS, Registration and Transfers simple and easy in one web-based secure management panel
- Domains & DNS can be assigned in groups making management easier. Group by Department, Client or company

## About CloudFloorDNS

CloudfloorDNS is the one-stop shop to handle the most crucial aspect of your Internet infrastructure, your domains and DNS. Without DNS, domain name registration and management services, your business does not exist on the Web. We empower and ensure your Internet presence is always delivered to your customers quickly, reliably, and securely.

With our next-generation suite of DNS and Domain management services, we do more than just connect your business to the web. We enable and accelerate your ability to achieve your online business objectives. CloudfloorDNS lets you spend less time managing your domain and DNS portfolio, and adds a powerful layer of speed and redundancy with our Anycast DNS and Advanced DNS services.

Customers select CloudFloorDNS for its ease of use, and because it's a rich domain and DNS management platform that is engineered for both power and novice users. Other benefits include the fastest failover available in the industry, powerful network monitoring with a variety of tests and protocols to detect failure, automatic and advanced failover, GEO DNS, next-gen global Anycast DNS Network, cloud DNS with CNAME at the root compatibility. Our Multi-Level ACL allows sub-users with specific permission for DNS editing, Registration and Renewals, and much more. Do more with CloudfloorDNS, and get an amazing set of features, unique DNS types, and personalized customer support with almost 20 years of expertise.

CloudFloorDNS was formed by the acquisition of MicroTech Limited by Everbridge Corporation, a US-based software company specializing in critical communications, mass alerting services and more. CloudfloorDNS has been providing DNS, domain registration and email services since 1996 and is one of the world's leading managed DNS providers. Our customers include governments, major financial institutions, multinational enterprises, as well as hundreds of small to medium-size business worldwide with over 65,000 domains under management.
