

MANAGED DNS SERVICES

Next to your domain name being registered, the next most important piece of technology in the chain of internet technology is DNS. It's the foundation of your online operations and when it goes down your business goes down with it. Email won't work, your websites are down, everything including online sales stops cold.

CloudfloorDNS Managed DNS services offer speed and reliability to your online presence. Our Incredibly fast and reliable global Anycast DNS network offers instant protection against slowdowns and outages.

Pair your Managed DNS services with our powerful domain management platform and you have a one stop shop for all your domain and managed DNS needs. Grow your business with our

Global Managed DNS for the Ultimate in Speed & Reliability

Advanced DNS services including Global GEO DNS for pinpoint DNS traffic management, and DNS Failover services for Disaster prevention and added reliability.

Having one of the fastest DNS servers on the planet can help your online sales operations by answering quicker and getting your visitors to your site faster. As your site grows, expand instantly with our Load Balancing services to help distribute traffic over multiple servers. Our GEO DNS services can help guide your visitors to their local presence, all via DNS and without expensive hardware.

With our domain registration services you have access to more than any other managed DNS provider on the planet. Choose from over 170 TLD's when registering or transferring new domains, keeping all of your DNS and

Domain management in one simple and secure web-based interface.

How our Managed DNS Services are Different:

- Anycast DNS that is IPV6 and DNSSEC compatible for the latest in DNS Technology. Non-Bind Solution for enhanced Security
- Templates for Registrations, DNS Settings and DNS Zones for quick and efficient setup and management
- Bulk domain and DNS edits make large domain portfolio's a breeze to manage.
- Secure Web and Domain Management panel makes DNS, Registration and Transfers simple and easy in one web-based secure management panel
- Multi-Level ACL allows multiple users with varied permissions for easy management of domains and DNS

About CloudFloorDNS

CloudfloorDNS is the one-stop shop to handle the most crucial aspect of your Internet infrastructure, your domains and DNS. Without DNS, domain name registration and management services, your business does not exist on the Web. We empower and ensure your Internet presence is always delivered to your customers quickly, reliably, and securely.

With our next-generation suite of DNS and Domain management services, we do more than just connect your business to the web. We enable and accelerate your ability to achieve your online business objectives. CloudfloorDNS lets you spend less time managing your domain and DNS portfolio, and adds a powerful layer of speed and redundancy with our Anycast DNS and Advanced DNS services.

Customers select CloudFloorDNS for its ease of use, and because it's a rich domain and DNS management platform that is engineered for both power and novice users. Other benefits include the fastest failover available in the industry, powerful network monitoring with a variety of tests and protocols to detect failure, automatic and advanced failover, GEO DNS, next-gen global Anycast DNS Network, cloud DNS with CNAME at the root compatibility. Our Multi-Level ACL allows sub-users with specific permission for DNS editing, Registration and Renewals, and much more. Do more with CloudfloorDNS, and get an amazing set of features, unique DNS types, and personalized customer support with almost 20 years of expertise.

CloudFloorDNS was formed by the acquisition of MicroTech Limited by Everbridge Corporation, a US-based software company specializing in critical communications, mass alerting services and more. CloudfloorDNS has been providing DNS, domain registration and email services since 1996 and is one of the world's leading managed DNS providers. Our customers include governments, major financial institutions, multinational enterprises, as well as hundreds of small to medium-size business worldwide with over 65,000 domains under management.
